PACTOTile EG 2
High Performance 2 component Epoxy Tile Adhesive and Grout

DESCRIPTION
PACTOTile EG 2 is a two component solvent-free, water cleanable, antifungal and anti-bacterial epoxy resin based adhesive and grouting system, which provides excellent adhesion and chemical resistance in medium and heavy duty corrosive and hygienic environments.

TYPICAL USES
PACTOTile EG 2 is designed to provide permanent fixing for ceramic tiles where a hygienic, chemically resistant and waterproof adhesive is required.

The product is recommended for wall and floor tiling in:
- Food processing areas and industrial kitchen
- Swimming pools
- Hospitals and Laboratories
- Plants and Electrical substations
- Heavy duty workshops and garages
- Bottling plants and breweries.

ADVANTAGES
- Good chemical and water resistant
- Good resistance to bacterial and fungal growth
- Curing is not affected by high humidity
- Impact and vibration resistant
- Available in a wide range of colours.
- Water Cleanable.

PACTOTile EG 2 should be used in critical situations where traditional cementitious adhesives are inappropriate particularly in aggressive environments. It has a good resistance to commonly encountered dilute acids, alkalis, salts, oils and fats.

STANDARDS:
ANSI A118.3,

TECHNICAL DATA (Typical results @ 23±2°C)

CHEMICAL RESISTANT
Very good to:
10% Lactic acid, 10% Citric acid, 40% Phosphoric acid, 50% Hydrochloric acid, 50% Sulphuric acid, Concentrated bleach, Saturated sugar solution, Saturated urea solution, White spirit, Oil, Petrol, Greases, Xylene, 10% Ammonia, 50% Caustic soda

Good to:
Butanol, Skydrol

APPLICATION
SURFACE PREPARATION
The substrate must be clean and dust free. All contaminants such as friable material, grease and oil should be removed completely.

MIXING
The total contents of the hardener should be emptied into the base component and stirred thoroughly using a drill and paddle until a smooth paste which is uniform in colour, is obtained.
APPLICATION
The mixed material should be applied to the substrate using a toothed tiling comb. The tiles should be pressed firmly in place using a twisting action to ensure good contact with the adhesive. Typical adhesive depths will approx. 3 – 4 mm. Remove any excess adhesive from the surface of the tiles with a dry cloth immediately.

The joints between tiles may be grouted using PACTOTile EG2 applied by plastic spatula, working on a maximum area of 0.5m² at a time.

COVERAGE

<table>
<thead>
<tr>
<th>Tile Adhesive:</th>
<th>3.7 kg/ m²@ 2mm thickness</th>
<th>Grout:</th>
</tr>
</thead>
<tbody>
<tr>
<td>Tile size</td>
<td>150 x 150</td>
<td>Joint width</td>

</tbody>
</table>

Grout consumption calculation

\[
\frac{(Width + Length) \times Joint \times Depth \times Specific \ Gravity}{Width \times Length} = kg/m²
\]

Above figures are theoretical values only. Allowance for wastage should be considered.

EQUIPMENT CLEANING
Tools may be cleaned using water whilst the product is in its uncured state.

Once hardened the product can only be removed by mechanical means.

PACKAGING

PACTOTILE EG 2 is supplied in 2 components 15 kg set, it is supplied in several standard colors.

STORAGE AND SHELF LIFE

PACTOTile EG 2 has a shelf life in excess of 12 months when stored in original containers in a cool dry environment. At temperatures above 35°C, the pot life will be reduced.

HEALTH AND SAFETY

PACTOTile EG 2 should not come into contact with eyes or skin, nor should it be ingested. Ensure adequate ventilation and avoid inhalation of vapour. Wear adequate protective clothing including gloves and eye protection. If contact with skin occurs, rinse with water then clean using soap and water. If swallowed, DO NOT induce vomiting. Seek medical attention immediately.

FLAMMABILITY

PACTOTILE EG 2 is non-flammable

FLASHPOINT

PACTOTILE EG 2 >150°C
